

## How to Use HandBrake to Compress Video Files

## Download HandBrake

1. Navigate to the main <u>HandBrake</u> page and then click on the download button.

- 2. From the download page, follow the download and installation instructions.
- 3. After installation, launch HandBrake and then follow the instructions in the next section.

## Compress Video Files

Handbrake is a feature rich application that can be configured in many ways. This document describes the simplest way to use HandBrake. You can visit the <u>HandBrake documentation</u> page if you would like to learn about other HandBrake features and options.

1. Open HandBrake. By default, the application opens in the Source Selection screen.

😼 HandBrake		_		×
Source Selection	) Start Encode Queue 🗭 Preview 📷 Activity Log 🛃 Presets			Ţ
Then choose the video(s) you'd like to encode: Folder (Batch Scan) Open a folder with one or more files.	Angles     Ranges     Chapters     v     -     Durations     Reload     Sare New Preset

				Open		Cancel	

- 3. Click on the file, and then click the **Open** button to open this video file into Handbrake.
- 4. There are many options that you can configure for the compression process. We recommend you check the **Web Optimized** box and then use the standard pre-set configuration that loads automatically.
  - a. If you would like to learn more about the configuration options, visit the Handbrake <u>Opening a video source</u> documentation.
- 5. Click the browse button in the lower right of the screen to set the location where the compressed file will be saved.

iave As:			Browse

6. Select the destination folder where the compressed file will be saved, and then enter a name for the compressed file. Click the **Save** button.
